PROFILE SUMMARY

Senior Front-End Developer with 7+ years of experience specializing in **React** and **Next.js**, building fintech and AI-driven applications. Focused on **frontend architecture**, scalable UI systems, and performance optimization across production environments.

SKILLS

Languages: JavaScript (ES6+), TypeScript
Frontend Development: React, Next.js, Vue, Nuxt.js
State Management & Data Layer: Redux, React Query, Zustand, Recoil, Pinia
UI Engineering: Tailwind CSS, CSS Modules, styled-components, SCSS, Material UI, Ant Design, ShadCN/UI
Networking & APIs: REST APIs, GraphQL, WebSocket, API/SDK Integration
Frontend Architecture: Component architecture, Design systems, Reusable UI libraries, FrontEnd performance optimization, State and data architecture
Build & Tooling: Vite, Webpack, Git (GitHub, GitLab)
Workflow: Jira, Linear, Monday

WORK EXPERIENCE

Technance | Senior Front-End Developer

Nov 2025 - Mar 2026 | Dubai (Remote)

Fintech company providing infrastructure for building and scaling cryptocurrency trading platforms.

- Owned **frontend architecture** of fintech backoffice system for payment operations and provider workflows using **Next.js**.
- Integrated frontend systems with internal SDKs and **payment APIs**, ensuring reliable financial data flow in transaction-critical workflows.
- Contributed to shared frontend libraries and enforced code quality standards (Biome, documentation), improving maintainability across repositories.
- Used AI-assisted development tools (Cursor, Claude) to accelerate implementation of spec-driven frontend features across internal tools.

Zebracat AI | Senior Front-End Developer

Jul 2024 – Oct 2025 | Berlin, Germany (Remote)

AI-powered video generation platform with customizable editing workflows.

- Led frontend architecture of **video editor** and dashboard in React, supporting complex media workflows.
- Reduced bundle size from **20MB to 30KB** by redesigning dependency structure and replacing heavy runtime libraries with API-driven alternatives.
- Implemented performance optimizations including code splitting, lazy loading, and rendering improvements for media-heavy UI.
- Introduced offline resilience using **Service Workers** to maintain functionality during deployment downtime.
- Built and shipped **AI-driven features** such as custom avatar creation and video generation workflows, defining UI/UX behavior in absence of formal product designs.

Cloudzy | Senior Front-End Developer Aug 2023 - Aug 2024 | Tehran, Iran (Hybrid)

VPS and cloud infrastructure provider serving global clients.

- Led migration of core frontend from **Gatsby to Nuxt.js**, improving architecture scalability.
- Designed reusable UI structure for cloud platform modules, improving consistency across products.
- Optimized bundle and **runtime performance** by removing dead code and reducing dependency overhead.

Digikala-Group/Smartech | Front-End Developer Nov 2022 - Aug 2023 | Tehran, Iran (on-site)

Marketing technology service provider for Digikala

- Improved frontend performance and reduced load time through optimized components and rendering strategies.
- Decoupled frontend architecture from **Redux-heavy structure,** improving responsiveness and maintainability.
- Delivered **business-critical frontend features** for marketing and customer engagement workflows.

Rental Tracker | Senior Front-End Developer Apr 2020 - Nov 2022 | Tehran, Iran (on-site)

Inventory and Warehouse Management Software for the Film

- Designed **scalable frontend architecture** for inventory and warehouse management system used in production operations.
- Reduced UI development time by **~50%** by creating **reusable component patterns** and modular UI structures.
- Standardized frontend architecture through consistent design patterns and component reuse across modules.
- Collaborated with backend and product teams to streamline feature delivery for operational workflows.

Pezeshkekhoob | Front-End Developer Aug 2018 - Mar 2020 | Tehran, Iran (on-site)

An online system for reservations and consultations doctors and psychologists.

- Migrated legacy frontend architecture to **React/Next.js**, improving maintainability and long-term scalability.
- Designed and implemented a **role-based admin system** for internal operations and workflow management.
- Built data-driven **dashboard architecture** to support business intelligence and operational decision-making.
- Improved frontend structure and component reusability across core platform modules.

EDUCATION

Bachelor's Degree in Software Engineering 2016-2018
Islamic Azad University - Tehran, Iran

Associate Degree in Software Engineering 2013-2015
Narjes technical college - Semnan, Iran

LANGUAGES

Persian: Native
English: Intermediate (B1)
